

SUPPORTING MEMBER SIGN-UP FORM

By 2025, The South African Plastics Pact aims to change the way plastic products and packaging are designed, used and reused to ensure that plastics are valued and never become waste, by;

- Taking action on unnecessary and problematic packaging and plastic products through design, innovation or alternative delivery models
- 100% of plastic packaging to be reusable, recyclable or compostable* by 2025 (*applicable only in closed loop and controlled systems with sufficient infrastructure available or fit for purpose applications).
- 70% of plastic packaging effectively recycled (input recycling rate) by 2025.
- 30% average post-consumer recycled content across all plastic packaging by 2025.

As a supporting member your organisation will be involved in activities to identify solutions, amplify messages and cascade best practice.

By signing up to The South African Plastics Pact, your organisation is:

- Demonstrating your support for the vision, aims and objectives of the South African Plastic Pact as well as the targets;
- Creating visibility for your organisation as a leader; and
- Recognising the need for local solutions that tackle plastic waste and pollution at source, in South Africa.

Sign up now and help us lead the change.
